MKEnX's soft and comfortable ear loops are welded on both sides of the face mask. It allows better protection by closely adhering the mask to the wearer's face.

We use high-quality nylon and polyester to produce our ear loops to ensure a snug fit while remaining light and comfortable.

The ear loops come in round and flat shapes, which are braided/knitted at either 8-Needles or 14-Needles.

With the launch of our latest vibrant colour range, our ear loops not only offer the best in comfort, softness, tension but also in style.

NYLON/POLYESTER EAR LOOPS

OUR EAR LOOPS
